EXPERIENCE

UPGRADED ERA — *QAP Tester*

Performed application testing on both mobile and web applications of MyMTN to ensure reliability and usability.

August 2021 - 2023

- Conducted functional regression, smoke and sanity testing on the MyMTN mobile and web applications.
- Documented defects clearly with steps to reproduce, screenshots and expected vs actual results.
- Collaborated with development teams to help resolve bugs and improve application performance.
- Proved successful working under tight deadlines within a fast paced environment while maintaining high attention to details.
- Conducted social media analysis and user feedback analysis to identify usability issues.

LOCTECH NG — IT Support *Intern*

Provided first line technical support and troubleshooting assistance to users in an IT environment.

Jan 2015 - Feb 2017

- Provided technical and operational support to staff by troubleshooting system and software issues.
- Assisted employees with resolving technical problems and guided them through solutions.
- Prepared workstations and access credentials for new staffs during onboarding.
- Maintained clear documentation of reported issues and solutions
- Installed and configured office software and system updates.
